## NZJSA TECHNICAL INSPECTION RECORD PRE-MEASURED

Refer to Rulebook and measuring guidelines for full specifications and restrictions on elements to be checked Complete this form and copy to the secretary of the NZJSA

| Boat Details  Driver Name:  | Poot Nu | mhor:                    |              |
|---|---------|--------------------------|--------------|
| Driver Name: Boat Number:<br>Class: <i>Please Circle</i> Group B Group A Engine Make: |         |                          |              |
|   |         |                          |              |
| Displacement Naminal Bindagement  | P = Pa  | ss r=raii na=not appiica | P / F / NA   |
| Nominal Displacement  |         |                          |              |
| Seals as per log book sheet (fill out & submit)                                       |         |                          | P / F / NA   |
| Conrod/Crankshaft Material  |         |                          | P / F / NA   |
| Oiling System – as per rule book  |         |                          | P / F / NA   |
| Bore/Stroke (as measured)   |         |                          | P / F / NA   |
| Calculated Displacement (bore x bore x 0.7854 x 8 x stroke)                           |         | 412 Cu Inch (6752cc)     | P / F / NA   |
| Cylinder Heads  |         |                          |              |
| Cast Iron Only / General Configuration  |         | )                        | P / F / NA   |
| OEM Production Position Only  |         |                          | P / F / NA   |
| Valve Angle (OEM for Engine)  | C       | hevy 23° +/- 0.5°        | P / F / NA   |
| Inlet Valve   | 2       | .125° Max                | P / F / NA   |
| Exhaust Valve   | 1       | .625° Max                | P / F / NA   |
| Inlet Port  | A       | s per Gasket             | P / F / NA   |
| Exhaust Port  | V       | isual Inspection         | P / F / NA   |
| Inlet Gasket / Port and Bolt location   | F       | elpro 1207 prod Location | P / F / NA   |
| Added material to port. eg ramps, epoxy   | V       | isual Inspection         | P / F / NA   |
| Any device which alters the config of the manifold/induction or exhaust system        | V       | isual Inspection         | P / F / NA   |
| Repairs to Heads / Inserts etc  | V       | isual Inspection         | P / F / NA   |
| Top of Intake Port to Head Deck surface along plane of intake face (refer guidelines) |         | 1ax 2.500°               | P / F / NA   |
| Intake Manifold   |         |                          |              |
| General Config / External Appearance  |         |                          | P / F / NA   |
|   |         |                          | P / F / NA   |
| OEM Bolt Pattern / Position   |         |                          | 1 / 1 / 11/4 |
| Carburettor   |         | /N - 4770                | P / F / NA   |
| Holley Part No (B's)  |         | /No 4779                 |              |
| Modifications (B's)   |         | hoke / Floats / Valve    | P / F / NA   |
| Throttle Body Bore below shaft C/L  | 1       | -11/16° Inch Max         | P / F / NA   |
| Camshaft  |         | .500° + 1%               | P / F / NA   |
| Inlet Lift  |         | .500° + 1%               | P / F / NA   |
| Exhaust Lift  |         |                          |              |
| Tappet  | F       | lat Only                 | P / F / NA   |
| Oil Pump (B's)  | T       | 05141                    | P / F / NA   |
